WebProMag.comEx-governor of Mexico's Puebla state found dead at lake MEXICO CITY (Reuters) - The body of former Mexican governor Javier Duarte de Oca was found floating in a lake in his home state of Puebla on Thursday, five days after he vanished in the town of Casas Grandes while traveling with a woman he allegedly kidnapped. Mexican police spokesman Roberto Alvarez said the body of a man was found in the Corozal Lake with injuries to the head and torso, and the official cause of death will be determined by a forensic examination. Duarte, who led Puebla state for 11 years under the Partido Revolucionario Institucional (PRI) party until he resigned in early 2012, was last seen on Wednesday in the nearby town of Casas Grandes. The 51-year-old governor's disappearance, along with that of a suspected kidnapper and the arrest of a man who said he had helped Duarte

escape in the early hours of Wednesday, triggered an overnight police manhunt, which was on Thursday suspended. The woman who is said to have taken Duarte has still not been found. Her sister, who said she was "delighted" by the news of the governor's death, told local radio she had yet to speak with her. Alvarez said Duarte's vehicle was found at the center of the town of Santa Catarina de Margaritas, though Duarte could have been driving the vehicle before he was kidnapped. He said it was not yet clear whether the body found on Thursday was that of Duarte, but Alvarez said the body of a man had been found in Corozal Lake with injuries to the head and torso. It was not clear how the man got into the lake. Police found a
